

Press Brake Operator

Workplace Modular Systems is a growing manufacturer of a variety of metal workstation components, made using state of the art equipment and technology. Over the past 65 years, our solutions have helped hundreds of thousands of companies nationwide to improve worker ergonomics and enhance productivity. We're looking to hire an experienced press brake operator to help production goals today and grow with us in the future. An ideal candidate is a team player with high attention to detail to ensure our product is built to meet our company standards and customers quality expectations.

Objectives and Responsibilities

- Accurately and efficiently operate press brake machinery in a manner that is safe for yourself and others
- Perform self-inspection on first produced part and verify quality throughout the production run
- Ability to stand for prolonged periods of time and perform repetitive movements
- Meet daily and weekly production goals to fulfill product demand and follow production instructions, either written or verbal
- Strong work ethic, attendance, punctuality, and initiative
- Adhere to company safety policies

Skills

- Experience with Trumpf Press Brakes and using cold-rolled and stainless-steel materials
- Shop math skills and knowledgeable on adjusting clearances
- Ability to hold tight tolerances, adjust controls/parameters, and other minor machine calibrations, as needed
- Able to read and understand work orders and blueprints
- Familiarity with Solidworks/AutoCAD

Benefits

- 1st Shift – 40 hours guaranteed
- Health, FSA, dental and life insurance
- 401K matching
- Performance bonus
- Paid vacation & company holidays
